Auto cache cleaner full apk

The Cache Cleaner app is an easy-to-use tool for cleaning application caching files and freeing up storage space on your device. And the best thing is, you don't need to ROOT your phone anymore to do so! This app is important for any device that has memory management issues. You can now fix low memory issues and get more storage space available by emptying cache/data files created by apps. ■ Features-----★ 1-tap to clear all caching files★ Auto clear when you open the application★ Auto clear the cache at the specified time interval★ Automatic Exit after you clear all cache files★ for the specified application★ List of applications with either cache size or application name★ Clean residual files With long pressing any item in the application list, you can:★ Share apps with your friends★ View applications on Marketplace★ Remove application installations that have cached files★ Open apps★ Show app details to your Website Review----- just want to clear the application details you don't have to wait for an app list solution. Just tap the 'Clear All Cache Files' button. You can rebuild the list of applications by going to MENU > Refresh, and choose different types on MENU > SortFor more settings, please tap MENU > Settings.■ Faq-----Q: How is the cache cleared? A: It's quite simple. Just open the app cache cleaner and tap the clean button, and it will clean the cache for your phone. Q: What are the cached files? A: Cached files are a mechanism for temporary storage (caching) web documents, such as HTML pages and images, to reduce broadband usage, server loads, and omissions seen. Cached files keep copies of documents passing through them; subsequent requests may be satisfied from the cache if certain conditions are met. Cached files are stored in the phone's built-in memory, and can sometimes take up a lot of storage space. Through cached file explanation, you can recover valuable phone memory space. Most importantly, cached files can be cleaned safely. SIGA-NOS Page 2 SIGA-NOS SIGA-NOS Page 2 SIGA-NOS Android Device slow? suspended device every time? always looking at application messages not responding? No more & Memories The Cleaner Cache app is the tool you're looking for. With full automatic scanning of the cache, automatic cleaning cache, RAM automatic scan (random access memory) and full automatic cleaning of the memory (RAM), your device will no longer be the same. Optimize your android phone speed and do away with slow phones and tablets today. Alongside the privacy eraser and full history eraser, your privacy will remain to you alone. In one pipe, empty your app's cache, kill the task and delete history. —anything that is cache?— Your phone or tablet wants to be fast when used, so if for example it gets files from the internet or loads webpages from the internet, it will save this file in the device as a cache so that if you want to see the file again, rather than going to the internet again, it will go where the file is (files) are stored and load them from there. The sad part is that after you finish using these files, they are not wiped out and filling up your device makes it slow so that the application cache cleaner comes to save because it can detect and clean these files automatically or can be cleaned manually. —why the history cleaner?— Your privacy is yours solely. You can decide to go one app after another to clear your history and privacy but it's boring, so the Memory Cache Cleaner & The app comes with a single pair to clear all your history and privacy. You can also choose what needs to be marketed and what doesn't! —why kill tasks?— phones and tablets are slowly unpleasant and the culprit is the memory used by your invisible background tasks, so killing these tasks, will free up memory and your device will quickly as you want and memory & application cache cleaners will do so. Ele justifies que voc facilmente limpar cache memória do automated aplicativo. Carregar na memória e emblem são muito poucos. O leve shape. Também é possível limpar, começando aplicação. Não automático. Voc pode iniciar partir perform widget. Função principalAutomática de cache limpo.> 30 minutos toque uma limpo 24 horasCache. Claros auto no começo da aplicação. Depois depois de limpar o cache, e terminar o aplicativo automatic. Desinstalar o aplicativo. Cache search rápido. [Conveniencia automática] O inhabitants, mas kara na memória e uma although são muito poucos. As características tais como automática que não requerem esforço é adicionado. * como Battery Mix app, por siding with verifique. Voc quer iniciar o aplicativo todos os him?
